To Teachers,

Hand out these cards to students, give them enough time to make up an event and a time for one day on the calendar, and then fill in all the other information.

To make this game easier, limit the time to evenings, either 5-7, or 7-9 pm. You may also include 5-9.

Then have the students race round to invite as many people as possible.

If you are free, you accept the invitation, if not, you respectfully decline. The faster you are, the more people you will get to your party.

Get the students to take a memo of how many people are coming to their party.
